Online Course & Program Definitions

ONLINE COURSE-LEVEL DEFINITIONS

Online Asynchronous Course (own time, off-campus)*
All course activity is done online with no pre-scheduled sessions. Purely online courses
eliminate geography as a factor in the relationship between the student and the institution.
They consist entirely of online elements that facilitate the three critical student interactions:
course content, course instructor, and other students. These courses are designed to
meet the needs of students who do not have effective access to campus. They may reside
near the campus, or they may reside quite a distance away in other states or even in other
countries.

Online Synchronous Course (scheduled, off-campus)*
Web-based technologies are used to deliver classroom lectures and other activities to
students in real time during pre-scheduled sessions. These courses use web conferencing
or other synchronous media to create a real-time classroom experience, including
interaction with classmates and the instructor.

Blended Course(both online and on-campus components)*
Course activity is done asynchronously online, but there are required real-time
(synchronous and classroom-based) instructional activities, such as lectures, discussions,
labs, or other face-to-face learning activities. The distinction of blended is important
because the inclusion of face-to-face work sets geographic limitations on student access.

ONLINE PROGRAM-LEVEL DEFINITIONS

Online Program (off-campus)*
Course designations include any combination: Online Asynchronous or Online Synchronous
All credits required to complete the program are offered as fully online (synchronous or
asynchronous) courses. Students can complete the program completely at a distance,
with no required on site meetings. Fully online programs are designed with the truly distant
student in mind, also providing support services—registration, testing, advising, library
support, etc.—at a distance.

Blended Program (both online and on-campus components)*
Course designations may include any combination: Online Asynchronous, Online Synchronous, Blended, or In-Person.
A significant percentage, but not all, of the credits required for program completion are
offered fully online. These programs provide increased access to students who are
able to come to campus for some courses, laboratory work, intensive residencies, or
other occasional group sessions. In-person sessions are organized to minimize travel
requirements for distant students. All academic support services are available to distant students as well.
